The profits per acre is based on corn valued at \$1.50 per bushel. The highest yield was 141.1 bushels produced by Bryan Drinnen of Knox county. The lowest cost per bushel was 9c, reported by Lester Cupples, of Madison county. The average yield per acre was 114.4 bushels and the average cost per bushel for 19 of the club members was 24 cents. This would mean a net average profit of \$144.09 for 19 acres.

The World's Largest Production of Tires on the Smaller Cars Alone

We call attention not so much to the size of this average daily production as to the extent of the effort we put into the making of these 30x3-, 30x3½-, and 31x4-inch sizes.

The separate factory we have devoted to their manufacture is not only the largest of its kind in the world, but it makes fully effective that experience and resourcefulness which have produced the tires most popular on the higher-priced cars.

No tires bearing the Goodyear name contain a higher relative value than these tires for Ford, Chevrolet, Dort, Maxwell and other cars requiring the sizes mentioned.

If you own one of these cars, go to the nearest Goodyear Service Station Dealer for these tires and for Goodyear Heavy Tourist Tubes. He has them.

30x3½ Goodyear Double-Cure \$23.50
Fabric, All-Weather Tread

30x3½ Goodyear Single-Cure \$21.50
Fabric, Anti-Skid Tread

Goodyear Heavy Tourist Tubes are thick, strong tubes that reinforce casings properly. Why risk a good casing with a cheap tube? Goodyear Heavy Tourist Tubes cost little more than tubes of less merit. 30x3½ size in water-proof bag \$4.50
